

The MaestroVision Video Library and Archiving System provides municipalities with a centralized solution for managing an unprecedented volume of video and varying video formats. From acquisition to distribution across multiple screens and locations, operators can quickly and cost effectively find relevant content.

System Features:

Search: Advanced search engine capabilities allow operators to retrieve all records containing the “key Word(s)”, compiling multiple media in a single search.

Rights Management: Security features protect content and limit access to material based on security clearance.

Central Storage: Provides a cost effective method of storing recorded files that can be accessed locally or remotely by other divisions.

Automatic Purge: A user defined amount of time determines how long material will reside in storage before being automatically deleted freeing up storage space.

Editing: System can automatically ingest material based on Mark In and Mark Out points creating a frame accurate shot list and eliminating unwanted material.

Intuitive User Interface: Designed for non technical users, the intuitive user interface and system intelligence simplifies system operation.

Proxy Preview: Operators can preview material using the proxy generator before transferring or copying material from the system ensuring the correct video at all times.

Transcoding: MaestroVision transcoding capabilities eliminates compatibility issues between different video formats.

- ALSO AVAILABLE IN CLOUD FORMAT -

Seamlessly integrate the optional “Keyserve GC” recording system for the highest video /audio quality on the market today

Canada & USA 888-424-5505 / Mexico 800-514-5050

Specifications:

- All standard files supported.
- Multiplatform: compatible with Pc, Mac, tablets, smart phones, etc.
- **System configuration:**
 - Dual Intel Xeon processors
 - Two 10/100/1000 Ethernet controllers
- **Chassis:**
 - Dimensions:
 - Height: 5.2" (132mm)
 - Width: 17.7" (450mm)
 - Dept: 25.6" (650mm)
 - Rackmount chassis
 - Redundant power supply
 - Redundant cooling
 - Weight: 75 lbs (34 kg)

Options:

Storage:

- **VT-INT 24TB:** Internal 24TB storage/ 60,000 hrs (RAID-5)
- **VT-EXT 64TB:** External 64TB storage/ 160,000 hrs (RAID-5)

Archiving LTO:

- **VT-T50E:** 50 tapes LTO-5 library archive
- **VT-CNTL:** Library Control

Transcoder:

- **VT-TRANS:** Supports Mpeg-1, Mpeg-2, Mpeg-4, H.264, Windows Media, DV25, DV50, DVCPPro, HDV, VC-1, DPS, DivX, Flash, Real Video, QuickTime, AVI,ASF, MXF, LXF, GXF, sQ, Omneon, Spectrum, 3GPP
- **VT-Web I/F:** Website interface
